

## „HDR-E“ ELECTRICAL HIGH PRESSURE WASHER

**TRILETY endeavours to produce an environmental compatible and praxis suitable products and offers economic products for various operation areas.**

**As well as Electrical Sweepers the product range now includes the newly designed Electrical High Pressure Washer unit that can be used for many working operations.**

### TECHNICAL DATA

#### Assembly:

Tank volume: 1000l  
 High Pressure Pump: 15l / 150bar  
 Hose Reel: 10m  
 Pump Drive: Brushless motor 4kW  
 Battery: 4x 12V 230 Ah

Working Time: 1.5 – 3 Std.  
 Washing Time  
 Charging Time: 2 Std. = 75%  
 3 Std. = 100%

Measurements:  
 LxWxH: 1900x1400x1100mm

Assembly weight: 490 kg

#### Options:

Watering System: 2x Pump 17l / 2.5 bar  
 Hose Reel: 20m / ¾ inch

The electrical high pressure washer HDR-E is perfect for use in inner-city areas or for example park areas. The environment and the residence of the city or community are not contaminated with exhaust gases or noise

The washing unit can be mounted onto any commercially available vehicle platform. The high pressure pump is driven by an electronic controlled, maintenance free brushless motor. The power is supplied by four 12 volt batteries, that have a low acquirement price, quick loading, maintenance free and easily exchanged.

The HDR-E is universally usable because of the simple operation, maintenance and nearly fully autonomous working and can be used for cleaning from facade, sculptures, park banks and pathways etc.

An optional watering system with hose reel that can be used for the spraying grass areas, flower beds and flower boxes is available. A special extension for the spraying arm can be fitted so that hanging basket can be watered.
